

T9s4 Bluetooth System

These units have already been paired for your convenience. Please charge them fully before use.

These instructions are in addition to the enclosed manufacturer's instructions, please read both carefully before use.

TO USE:

Turn ON all units by pressing the POWER button for 4 seconds until you see a Blue light.

Single-press the "INTERCOM" button (The one with the helmet icon) on INSTRUCTOR unit (YELLOW)
Wait 10 seconds until all the units are flashing both Red & Blue LEDS together at the same time.

If any unit does not start to flash, press it's INTERCOM button once.

Wait another 10 seconds until it connects to the Instructor unit and starts flashing Red & Blue LEDS together.

Check the audio is coming through correctly. They are now ready to use.

PAIRING: (If necessary)

Although the manufacturer's instructions are clear, this may help:

Place the units in front of you in the order below from left to right & turn them all ON.

Student "RED" to Instructor "YELLOW" to Student "BLUE" to (4th unit "GREEN" if required).

Before any pairing operation you MUST press and hold the + & - buttons together until you see 3 red flashes on ALL units to clear the previous pairings.

Student (RED) press & hold the "INTERCOM" & the "+" buttons together until the unit flashes alternate Red & Blue then let go.

Instructor (YELLOW) press & hold the "INTERCOM" & the "-" buttons together until the unit flashes alternate Red & Blue, then let go.

Once the Student (RED) & Instructor have found each other, they will revert to a blue flashing light.

Now, again on the Instructor unit press & hold the "Intercom" & "+" buttons until it flashes alternate Red & Blue then let go.

Student (BLUE) press & hold the "INTERCOM" & the "-" buttons together until the unit flashes alternate Red & Blue then let go.

Once the Instructor & Student (BLUE) have found each other they will revert to a blue flashing light.

4th unit (GREEN) (if using)

Student (BLUE) press & hold the "INTERCOM" & the "+" buttons together until the unit flashes alternate Red & Blue then let go.

4th unit, press & hold the "INTERCOM" & the "-" buttons together until the unit flashes alternate Red & Blue then let go.

Wait a few seconds until they have found each other.
